

# The best small 24V amplifier with advanced audio class-D circuitry

## DD31T

DLS introduces new 24V cool running mini three channel amplifier. DD31T comes complete with a Sublevel remote control and Hi-Level input with AutoStart for easy upgrade of OEM radios.

If you want to connect external sources such as a mobile phone there is our unique parallel Aux input jack to help with that. With a footprint of only 215x103mm and 35mm height, it is possible to install in the armrest or under the dash while still producing 2x80 + 1x200-Watt RMS pure DLS sound in 4 Ohms.

### Specifications:

- 3 Channels audiophile Class D
- Power Output, 2x80W + 1x200W in 4 Ohm, 2x125W + 1x350W in 2ohm.
- Bass boost 0-+18dB
- High level input with AUTO-start function
- Unique DLS Aux parallel 3,5mm input jack (Aux cable can be connected while listen to OEM radio)
